

Table 1. Mean (SD) change from baseline to Week 52 for ABNAS total and domain scores during the Core and Extension A Maintenance Phase (Safety Analysis Set)

	n	Mean (SD) change from baseline
Total score	48	-4.7 (17.1)
Fatigue	48	-0.9 (4.0)
Slowing	45	-0.4 (3.4)
Memory	43	-0.6 (2.3)
Concentration	45	-0.5 (3.2)
Motor speed	44	-0.5 (1.8)
Reading (language)	40	-0.8 (2.2)

Only patients with non-missing data at both the baseline and the relevant post-baseline visit are included in the change from baseline summary statistics

A high score reflects a high level of cognitive problems

ABNAS, Aldenkamp-Baker Neuropsychological Assessment Schedule; SD, standard deviation
