

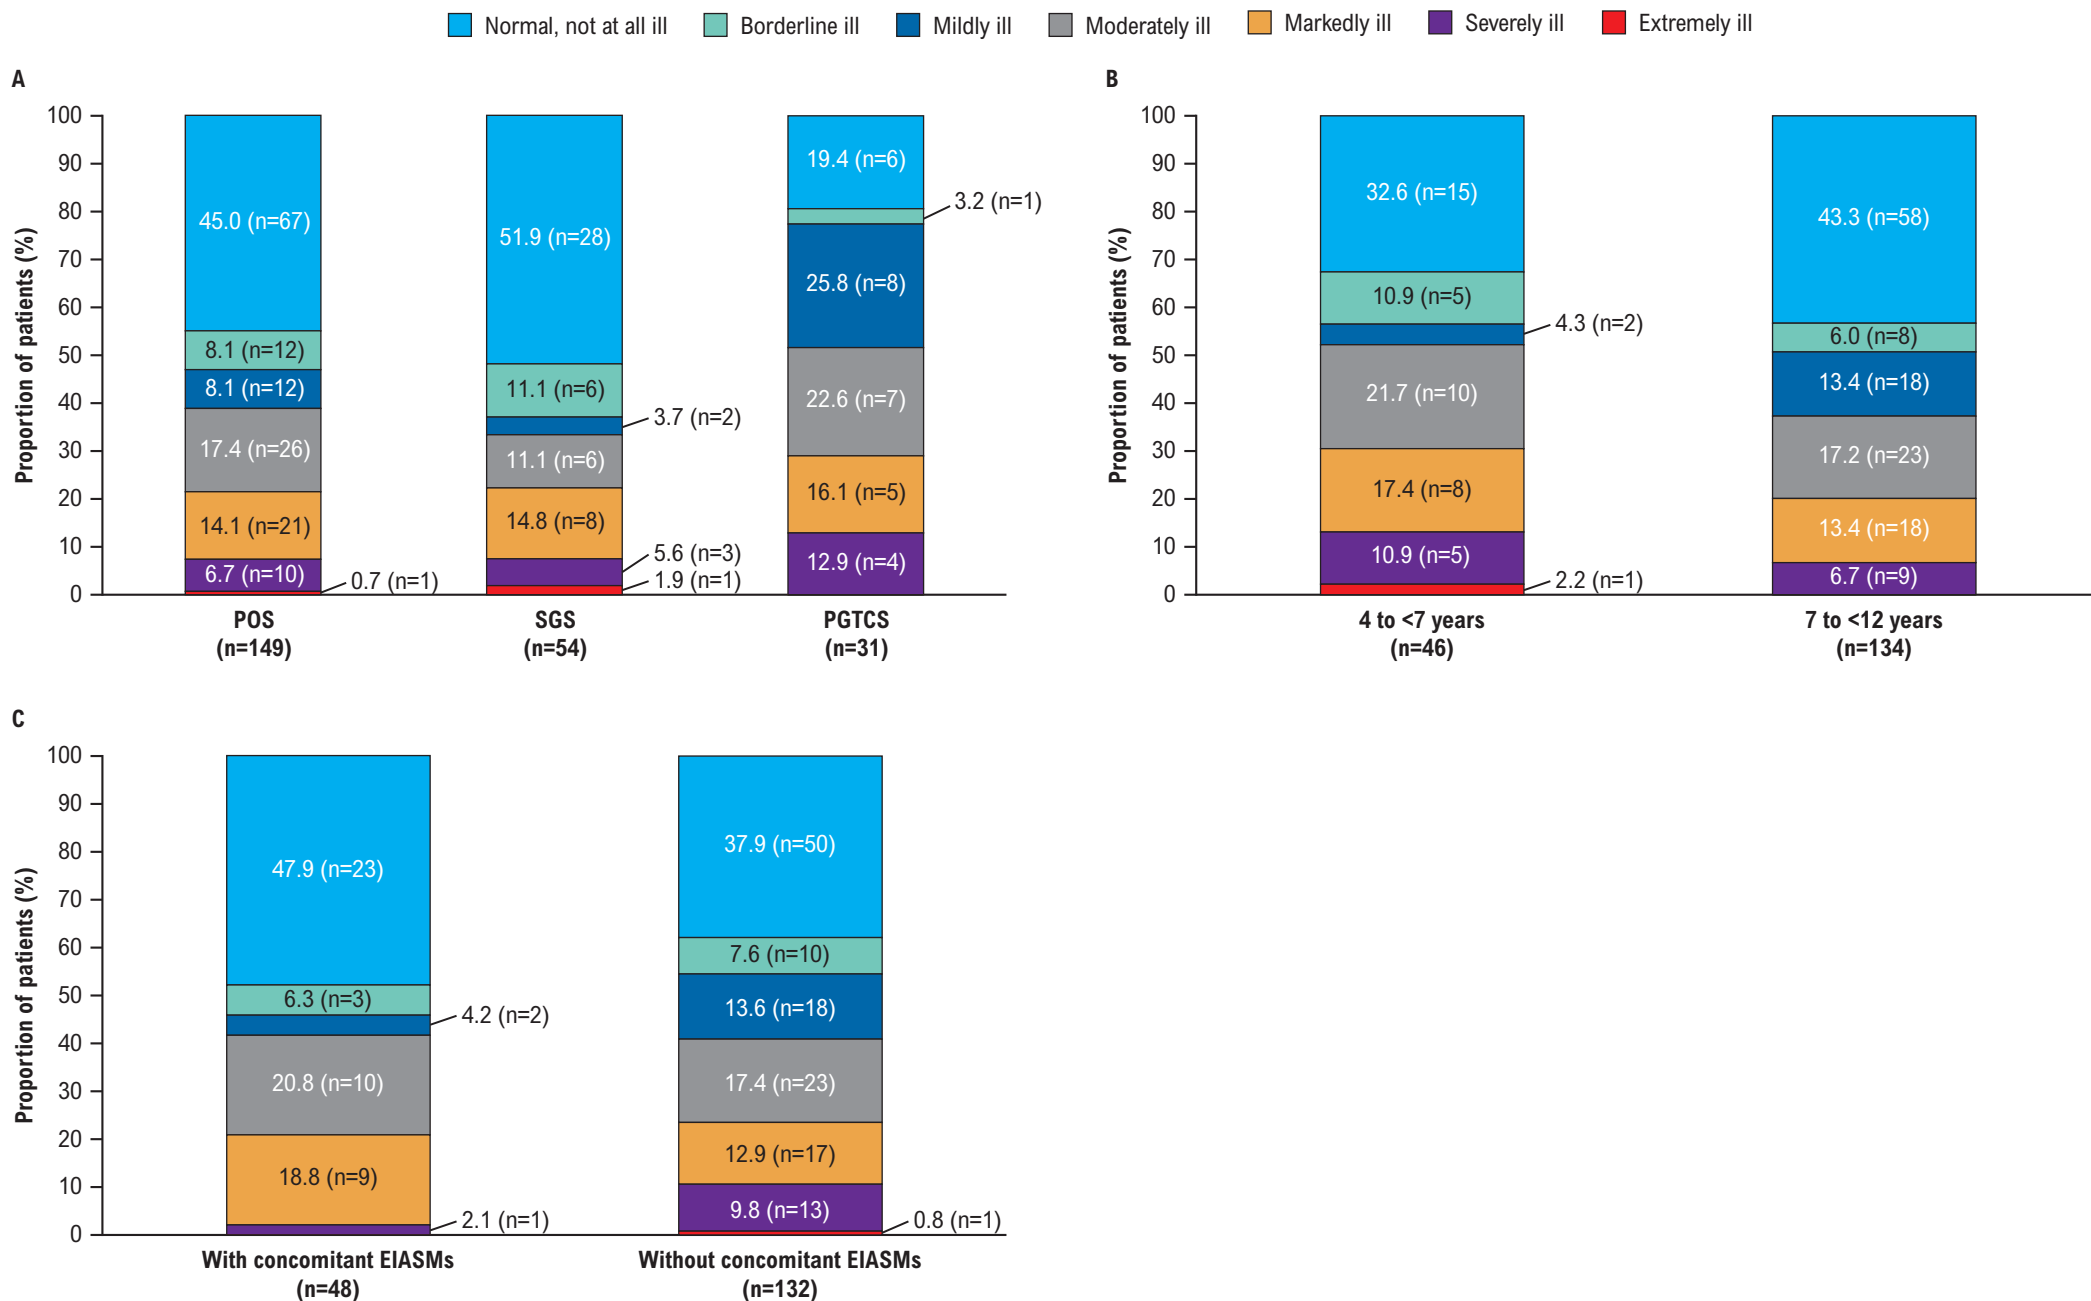

**Figure 1. CGIS at baseline by (A) seizure type,<sup>a</sup> (B) age group, and (C) EIASM use (Full Analysis Set; Week 0)**

Percentages are based on the number of patients with non-missing baseline and post-baseline data

<sup>a</sup>Seizure types were assigned by the investigator

CGIS, Clinical Global Impression Severity; EIASM, enzyme-inducing anti-seizure medication; PGTCS, primary generalized tonic-clonic seizures; POS, partial-onset seizures; SGS, secondarily generalized seizures
