

Figure 2. Kaplan Meier plots for time to progression from the time for inclusion for patients in group 2.
 Profile A1: one of the following scenarios is present; the GLUT-1 value was higher than the median value for GLUT-1 in group 2, and/or the CEA value was lower or equal to the median value of CEA for group 2
 Profile A2: GLUT-1 was lower or equal to the median value for GLUT-1 in group 2, and the CEA value was higher than the median value of CEA for group 2.
