

Table 2: Clinical Predictive Variables

	N (% of Total)
Prior Known Croup Episode ^a	102 (21.0)
Imaging During Admission	198 (39.1)
Specialist Consultation	61 (12. 1)
Otolaryngology	54 (10.7)
Laryngoscopy performed during admission	4 (0.8)
Critical Care	4 (0.8)
Other	3 (0.6)
Maximum BPEWS Score	
0	12 (2.4)
1	72 (14.2)
2	136 (26.9)
3	153 (30.2)
4	86 (17.0)
5	28 (5.5)
≥6	19 (3.8)

a: Percentages may not sum to 100 due to rounding. The descriptive analyses of Prior Known Croup Episode were based on total number of patients (n=485), while analyses of other variables were based on total number of visits (n=506).
