Re: Steven Dick, MD

Dear ASPN Awards Committee Members,

I am Tahagod Mohamed, a Pediatric Nephrologist at Nationwide Children's Hospital (NCH) and an Assistant Professor at the Ohio State University College of Medicine. I am pleased to write this letter in support of Dr. Steven Dick, a second-year Pediatric Resident at NCH, who has shown exceptional dedication to his work and a strong interest in Pediatric Nephrology.

Dr. Dick has been working closely with me on a research project aimed at improving the recognition and risk stratification of neonatal acute kidney injury. His commitment and enthusiasm for the project have been outstanding. He is preparing to present his research findings and data at the PAS 2025 Conference, a testament to his dedication and hard work.

Dr. Dick is also applying for the ASPN Trainee Research Award. This award is a prestigious honor for those in our field and given Dr. Dick's passion and commitment to Pediatric Nephrology, I strongly support his application for this award. His enthusiasm for our field and his dedication to improving patient outcomes are truly commendable.

Should you require any further information or have any queries, please do not hesitate to contact me.

All the best,

Tahagod Mohamed
