¹Values represent mean (SD) or % (N), as appropriate

²P values represent comparisons between parents of Black and Hispanic children using t tests where p<.1=*p<.05=***p<.01=***

³Child race/ethnicity defined by the parent. If they identified their child as both Black and Hispanic, they were coded as Hispanic. If they were identified as Black or Hispanic and another race then they were coded as Black or Hispanic for analysis.

⁴If present, up to 2 parents/caregivers per child could be enrolled. The second parent/caregiver provided only demographic and social network information.
