

Table 1. Major themes from FGDs with healthcare workers
Variable awareness of the national Tanzanian pediatric HIV testing guidelines that at the time recommended universal testing
Variable knowledge of hospital protocols for pediatric HIV testing at KCMC
<p>Healthcare workers described risk-based screening prior to the WHO HIV testing guideline update that considers the patient's:</p> <ul style="list-style-type: none"> • Family history: reported positive parental HIV status, parental death of unknown cause • Lack of expected improvement to medical treatment • Poor growth • Need for surgery
Providers consistently mentioned lack of personnel, equipment, and private spaces as barriers to HIV testing
