

<b>When considering physiologic stability in a patient with Grade 3 BPD, I or my institution consider:</b>	<b>N = 45 (%)</b>
Duration on Home Ventilator	44 (98%)
Positive end-expiratory pressure (PEEP)	35 (78%)
Peak inspiratory pressure (PIP)	28 (62%)
O2 Flow	41 (91%)
Surgical Feeding Route	38 (84%)
Degree of Pulmonary Hypertension (PH)	35 (78%)
Sedation Weaning	41 (91%)
Duration since last significant desaturation event	44 (98%)
