

Table 3. Association between desire for more support for any of the following areas and age group, gender, type of resident, and PGY year

	The ability to take time away from my unit (average score)		A specified peaceful location that is available to recover and recompose after one of these types of events		A respected peer to discuss the details of what happened		A resident/fellow assistance program that can provide free counseling to residents and fellows outside of work		A discussion with my program director about the incident		The opportunity to schedule a time with a counselor at my university program to discuss the event		A confidential way to get in touch with someone 24 hours a day to discuss how my experience may be affecting me
