

Table 4. Perceived Role, Clinician Receptivity, and Training Needs in Vaccine Communication

Survey Question	%(N) n=185
1. How important do you think your role is in talking about vaccines with families alongside their clinician?	
Not important at all	4.9% (9)
Slightly important	20.5% (38)
Moderately important	40.5% (75)
Extremely important	34.1% (63)
2. How receptive do you think the clinicians you work with are about you talking to parents/adolescents about HPV vaccines?	
Not receptive at all	3.2% (6)
Slightly receptive	9.7% (18)
Moderately receptive	25.4% (47)
Extremely receptive	61.6% (114)
3. How important do you think it is for you to receive training on vaccine communication (i.e., how to talk about vaccines with parents)?	
Not important at all	3.2% (6)
Slightly important	14.6% (27)
Moderately important	30.8% (57)
Extremely important	51.4% (95)
