

**Table 1. Multivariable Logistic Regression Predicting Flourishing Among Children Ages 6-17**

<b>Predictor</b>	<b>Adjusted Odds Ratio</b>	<b>(95% CI)</b>
Community Service Participation	1.74	1.53-1.97
Adverse Childhood Experiences (ACEs)	0.91	0.89-0.93
Children with Special Health Care Needs	0.23	0.21-0.26
Age	0.99	0.97-1.00
Race - Black, non-Hispanic vs White, non-Hispanic	0.87	0.72-1.06
Race - Hispanic vs White, non-Hispanic	1.06	0.91-1.24
Race - Multi-racial, non-Hispanic vs White, non-Hispanic	1.13	0.96-1.33
Poverty - 100-199% of poverty level vs 0-99%	0.98	0.78-1.23
Poverty - 200-399% of poverty level vs 0-99%	0.93	0.76-1.14
Poverty - 400% or more of poverty level vs 0-99%	1.09	0.88-1.34
Language - English vs Other than English	1.09	0.87-1.37
College degree or higher vs Less than high school	1.18	0.84-1.65
High school or GED vs Less than high school	1.19	0.85-1.67
Some college or technical school vs Less than high school	1.20	0.85-1.68
