

Table 1. Facilitators and barriers to diaper access.

Access Considerations		Family Experience		Funding and Cost		Knowledge and Resource Sharing		Supply and Location	
Facilitator	Barrier	Facilitator	Barrier	Facilitator	Barrier	Facilitator	Barrier	Facilitator	Barrier
Caseworkers	Administrative burden	Caregiver trust	Bias	Government funding support	Caregiver income prioritization or restrictions	Community engagement	Changing caregivers	Ample storage	Lack of storage
Colocation	Lack of medical home	Flexible information delivery	Lack of understanding of resources	Influx of grant funding	Cost of diapers	Data sharing	Communication failures between organizations	Consistent supply	Piecemeal approach
Consistency	Limited organization open time	Organization stigma mitigation	Cultural differences	Promotional offers	Inadequate staffing	Family support	Lack of caregiver knowledge of resources	Housing diapers with existing resources	Product complaints
Direct delivery	Social barriers	Readiness for help	Mistrust in system		Organization funding prioritization or restrictions	Low staff turnover	Lack of staff buy-in		Scale of need
Family-driven priorities	Weather and seasonal conditions	Apolitical organization	Privacy concerns		Organization value misalignment	Organization connections			Scarcity of diaper resources
Inclusive eligibility					Organization flexibility	Organization reputation			
In-home support					Transient caregiver income	School engagement			
Universal screening					Unsustainable funding
