

**Table 2. Reported Barriers Ratings**

<b>Variable</b>	<b>Overall Mean (SD)</b>	<b>Site 1 Mean (SD)</b>	<b>Site 2 Mean (SD)</b>	<b>Site 3 Mean (SD)</b>	<b>One-way ANOVA</b>
<b>Barriers</b>					
Time to complete evaluations	2.51 (0.92)	1.94 (0.68)	2.75 (0.86)	2.72 (0.96)	$F = 4.86^*$
Space to conduct evaluations	1.86 (0.94)	1.56 (0.73)	1.94 (1.06)	2.00 (0.97)	$F = 1.06$
Language spoken by family or availability of interpreter	2.12 (1.03)	1.88 (1.02)	2.44 (1.09)	2.06 (1.00)	$F = 1.23$
Support from my practice	1.79 (1.02)	1.25 (0.58)	2.31 (1.20)	1.74 (0.93)	$F = 5.16^{**}$
Scheduling patients	1.88 (0.94)	1.44 (0.73)	2.31 (1.08)	1.89 (0.88)	$F = 3.76^*$
Adequate number of children to evaluate	1.46 (0.70)	1.44 (0.63)	1.13 (0.34)	1.74 (0.87)	$F = 3.66^*$
Availability of testing materials	1.46 (0.73)	1.19 (0.40)	1.31 (0.48)	1.84 (0.96)	$F = 4.61^*$
Adequate payment	1.88 (0.88)	1.38 (0.62)	1.88 (0.81)	2.26 (0.93)	$F = 5.28^{**}$
Patient no-shows	1.94 (0.85)	1.38 (0.50)	2.25 (0.58)	2.05 (0.97)	$F = 6.36^{**}$
Enough referrals/ children to evaluate	1.63 (0.84)	1.5 (0.63)	1.56 (0.89)	1.84 (0.96)	$F = 0.82$
Confidence in my skills	2.27 (0.84)	1.88 (0.72)	2.44 (0.89)	2.42 (0.84)	$F = 2.50$
Parent consent/preference	1.69 (0.67)	1.38 (0.62)	1.69 (0.70)	1.95 (0.62)	$F = 3.39^*$
Complexity of clinical presentation	1.98 (0.67)	1.81 (0.66)	1.88 (0.62)	2.21 (0.71)	$F = 1.84$
Other	0.05 (0.22)	0.06 (0.24)	0 (0)	0.1 (0.31)	$F = 0.99$
Mean number of barriers endorsed	4.74 (4.82)	3.66 (4.17)	3.50 (4.75)	8.32 (3.85)	$F=9.96^{****}$
<b>Variable</b>	<b>% Overall</b>	<b>% Site 1</b>	<b>% Site 2</b>	<b>% Site 3</b>	
<b>Top 3</b>					
Time to complete evaluations	46.9	41.4	36.4	72.7	
Skill	44.8	37.9	34.1	72.7	
Complexity of presentation	41.7	37.9	27.3	72.7	
Proportion of barriers that may prevent ASD evaluation	73	42.9	83.3	76.5	$F = 2.00$

Note: One-way ANOVA examined site differences. Tukey's post-hoc tests indicated the following patterns of significant differences:

Site 1 < Site 2, Site 3: Time, Patient No-Shows

Site 1 < Site 2: Support from Practice, Scheduling

Site 2 < Site 3: Adequate Number of Children

Site 1 < Site 3: Availability of Testing Materials, Adequate Payment, Parent Consent/Preference

Site 3 > Site 1, Site 2: Mean number of barriers endorsed

\* indicates  $p < 0.05$ ; \*\* indicates  $p < 0.01$ ; \*\*\* indicates  $p < 0.001$ ; \*\*\*\* indicates  $p < 0.0001$
