

Table 1. CMS HAC and AHRQ PDI measures evaluated.

Source	Measure	Included in Analysis
CMS HAC	Air embolism rate	No - infrequent
	Blood incompatibility rate	No - infrequent
	Catheter-associated urinary tract infection rate	Yes
	Deep vein thrombosis and pulmonary embolism after certain orthopedic procedures rate	No - infrequent
	Falls and trauma rate	Yes
	Foreign object retained after surgery rate	Yes
	Iatrogenic Pneumothorax with Venous Catheterization Rate	Yes
	Manifestations of Poor Glycemic Control rate	Yes
	Pressure Ulcer Stages III and IV rate	Yes
	SSI, mediastinitis, after coronary artery bypass graft rate	
	SSI after cardiac implantable electronic device rate	Yes – composite SSI
	SSI after bariatric surgery for obesity rate	
	SSI after certain orthopedic procedures rate	
	Vascular catheter-associated infection rate	Yes
AHRQ PDI	Accidental puncture or laceration rate	Yes
	Central venous catheter-related bloodstream infection rate	Yes
	Iatrogenic pneumothorax rate	Yes
	Neonatal bloodstream infection rate	Yes
	Perioperative hemorrhage or hematoma rate	Yes
	Postoperative respiratory failure rate	Yes
	Postoperative sepsis rate	Yes

Abbreviations: Centers for Medicare and Medicaid Services (CMS); Hospital Acquired Conditions (HAC); Agency for Healthcare Research and Quality (AHRQ); Pediatric Quality Indicators (PDI); surgical site infection (SSI)
